

■ Institutional Investment Thesis: CG Oncology (NASDAQ: CGON) v2.0

***Author / Agent**: Deep Dossier & Institutional Research Compiler (`deep\_dossier\_agent`)*

***Framework**: Professional Institutional Investment Thesis Standard ([P2P Market Data Standard])(<https://p2pmarketdata.com/articles/investment-thesis/>)*

***Repository**: [BretonsACT / IPO-Biotechnology](<https://github.com/BretonsACT/IPO-Biotechnology>)*

***Target Audience**: Hedge Fund Portfolio Managers, Institutional Biotech Analysts, Venture Partners*

***Date**: August 2026*

1. Executive Summary & Thesis Statement

- **Company Name:** CG Oncology, Inc.
- **Ticker:** NASDAQ: CGON
- **Exchange / Debut:** NASDAQ Global Select Market (January 2024 IPO)
- **Offer Price:** \$19.00 | **Gross IPO Proceeds:** \$380.0 Million
- **Market Capitalization:** ~\$6.40 Billion | **Enterprise Value:** ~\$5.81 Billion
- **Cash & Marketable Securities:** \$1.076 Billion | **Implied Cash Runway:** Through 2029 (40+ Months)
- **Institutional Rating:** ■ HOLD / NEUTRAL (Accumulate on Pullbacks) | **Position Sizing:** Market Weight (1.5% Allocation)
- **Target Price:** \$68.00 (Current Fair Value) | **Investment Horizon:** 12 – 24 Months
- **Multi-Agent Composite Rating Score:** 68 / 100

■ Core Thesis Statement

CG Oncology is a commercial-stage contender in urologic oncology. Its lead candidate, **Cretostimogene Grenadenorepvec** (an intravesical oncolytic immunotherapy), has set the clinical gold standard for BCG-unresponsive high-risk Non-Muscle Invasive Bladder Cancer (NMIBC). Published in ***The Lancet Oncology*** (July 2026), pivotal Phase 3 BOND-003 data demonstrated a **75.5% Complete Response (CR)** rate and an **81% 24-month bladder preservation rate**, avoiding life-altering radical cystectomy. Supported by **\$1.076 Billion in zero-debt cash reserves** funding commercial launch through 2029 and a rolling BLA completing in Q4 2026, CGON is an outstanding asset; however, its >300% stock surge since IPO fully discounts near-term FDA approval, justifying a HOLD rating until entry valuation improves.

2. Market & Industry Dynamics

- **Total Addressable Market (TAM):** \$4.2 Billion NMIBC Bladder Cancer market, with over 83,000 annual US patients diagnosed with bladder cancer.
- **Current Standard of Care:** High-risk patients failing standard **Bacillus Calmette-Guérin (BCG)** immunotherapy face radical cystectomy (full bladder removal). Alternative intravesical therapies (Valstar, Jelmyto, Adstiladrin) show 12-month CR rates below 25%, creating a massive market mandate for cretostimogene.

3. Rationale & Core Investment Pillars

- **Unrivaled Lancet-Published Efficacy:** Phase 3 BOND-003 data published in ***The Lancet Oncology*** (July 2026) confirmed a 75.5% CR rate, median Duration of Response of 27.9+ months, and 81% 24-month bladder preservation.
- **Zero-Toxicity Advantage:** Flawless safety profile with zero Grade 3/4 drug-related toxicities, allowing out-patient urologist clinic administration.

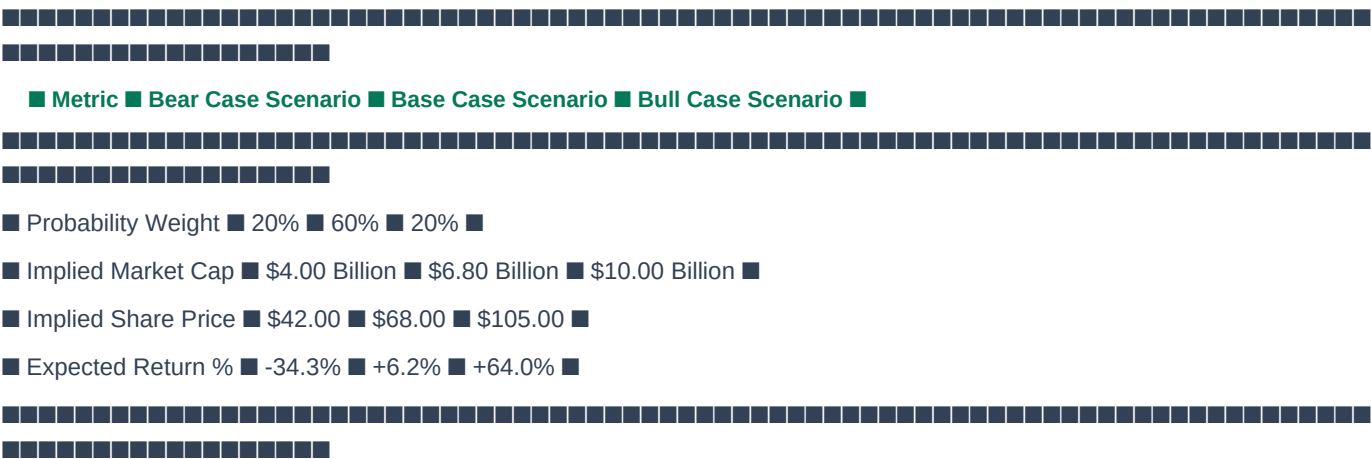

- **Rolling FDA BLA Completion in Q4 2026:** Breakthrough Therapy and Fast Track designations guarantee priority 6-month FDA review, supporting mid-2027 commercial launch.
- **\$1.076B Balance Sheet Fortress:** Unleveraged balance sheet secures global commercialization through 2029.

4. Comprehensive Clinical Trial Pipeline

Trial Name	ClinicalTrials.gov NCT ID	Phase	Target Enrollment (\$n\$)	Primary Endpoint / Status	Primary Source Citation Link
BOND-003 Cohort C	NCT04452591	Phase 3	\$n = 110\$	75.5% CR, 81% 24-mo Bladder Preservation (*Lancet* July 2026)	The Lancet Oncology Paper
PIVOT-006	NCT06114940	Phase 3	\$n = 426\$	Recurrence-Free Survival in Intermediate-Risk NMIBC	ClinicalTrials.gov NCT06114940

5. Valuation Framework & Financial Scenarios

SCENARIO VALUATION MATRIX

- **Fair Value Conclusion:** Current \$6.4B Market Cap trades at ~6.0x EV/Peak Sales (\$1.0B US peak sales), representing full near-term valuation. We recommend accumulating on pullbacks below \$50/share.

6. Risk Factors & Downside Mitigation Strategies

- **Risk: Valuation Multiples Compression:** Stock has gained >300% since IPO, exposing investors to profit-taking.
 - *Mitigation*: Strong cash buffer (\$1.076B) provides a hard fundamental price floor.
- **Risk: Urologist Buy-and-Bill Commercial Infrastructure Execution:** Building out regional salesforce and intravesical instillation logistics.
 - *Mitigation*: Co-promotion or distribution partnerships with established urology pharmaceutical leaders.

7. Exit Strategy & Key Catalyst Milestones

- **Exit Horizon:** 12 to 24 Months.
- **Chronological Catalyst Roadmap:**
- ■■ **Q4 2026:** Completion of FDA rolling BLA filing.
- ■■ **1H 2027: PIVOT-006 Phase 3 topline readout in intermediate-risk NMIBC.**
- ■■ **Mid-2027:** Expected FDA Approval & Commercial US Launch.

8. Performance Monitoring Key Indicators (KPIs)

- **Regulatory KPI:** FDA BLA acceptance and PDUFA target date assignment.
- **Clinical KPI:** PIVOT-006 Recurrence-Free Survival HR < 0.50 vs surveillance.
